Masterpiece & Classic Banded Ramp Sight Bead Fitting Instructions.

If the NECG front sight insert does not fit into the dovetail of your Masterpiece Banded Ramp or Classic Banded Ramp with Folding Hood, we suggest the following:

To fit these inserts, simply use a sheet of 220-320 grit sandpaper on a clean, flat surface.

Set the sight insert down onto the sandpaper.

Push the sight back and forth several times, being careful to keep the insert straight up.

From time to time try the insert in the dovetail.

Repeat as required until the insert slides completely into the dovetail and the bead lock plunger engages.

Tip: From time to time tilt the insert @ 45 degrees to the left and to the right to break the edge of the inserts dovetail. Breaking these edges may be all that is required to fit the insert.

For the final fitting of the sight insert we suggest some gun grease or oil on the bottom of the sight insert.

Should you require help or further instructions, please do not hesitate to call 603-287-4836.

Sincerely,

Mark Cromwell
